WHAT THE DATA SHOWS

1. China + Japan rose from 52.5% (2019) to 61.2% (2025) of imports. Growth went to the two largest sources.

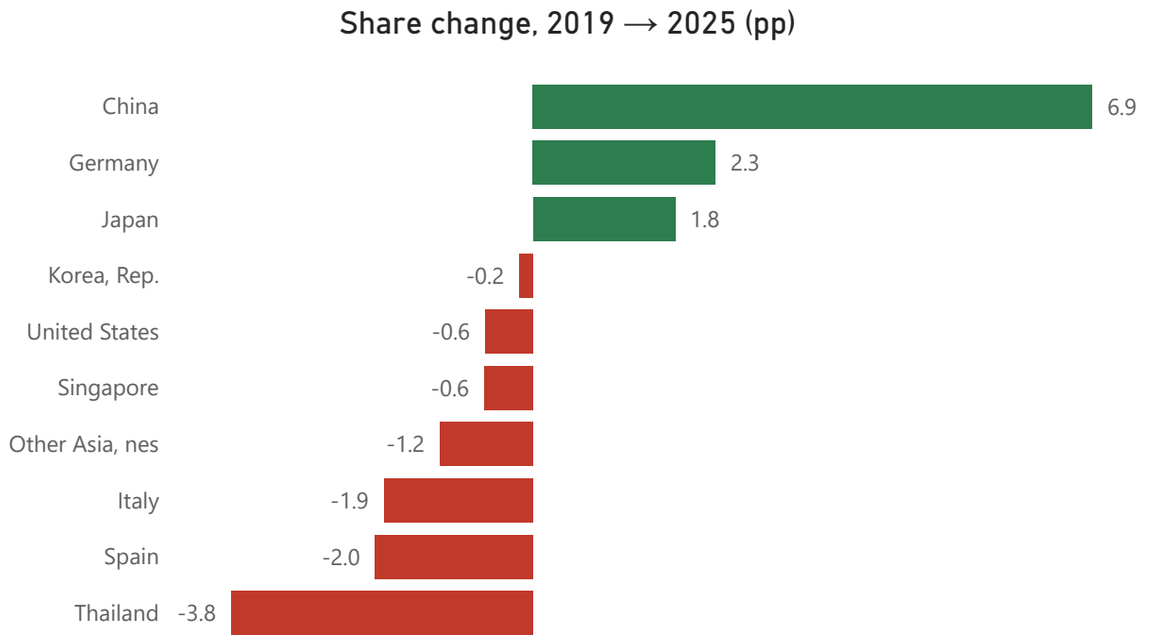

2. In 2020, imports from Japan fell 52% (57.5 → 27.8) while China fell only 3% (48.8 → 47.2). One source can lose half its volume in a single year.

3. The concentration index (HHI) rose from 1,591 to 2,065. The number of source countries barely changed (62 → 60): the market is not losing suppliers, it is leaning harder on the top two.

Source: UN Comtrade via WITS, downloaded Oct 2026. 2022 not reported by Indonesia (missing, not zero). HS 8483.40 includes gearboxes, gears and ball screws. Values in nominal USD; no quantity data. 2025 may be revised.

The market grew 38%. Not every source grew with it.

WHAT THE DATA SHOWS

1. Four of the top 10 sources imported less in 2025 than in 2019, while the market grew 38%: Thailand (−82%), Spain (−79%), Other Asia, nes (−28%) and Italy (−18%).

2. Thailand: 8.8 (2021) → 1.8 (2023). The drop spans the missing 2022, so it cannot be pinned to a single year.

3. Import data alone cannot explain why. These are open questions, not conclusions.
